Overview
The Francis Tuttle Computer Science Academy is designed to prepare high school students for success in colleges of computer science. Rigorous math and science courses (honors and AP level only) are combined with computer science related classes. Academy students gain the academic knowledge and skills needed for success in college, as well as an understanding of computer science to help them decide if this is truly the field they wish to pursue. High school students may attend for up to three (3) school years. Graduates from the Academy should be planning to pursue a college or university track to obtain a degree in some discipline of computer science. College credit for Advanced Placement courses is available upon passing the appropriate AP College Board Exam(s). Universities vary in their recognition of AP credits. Therefore, the number of available credit hours will depend upon the policies of the specific university the graduate plans to attend.

Employment Opportunities
This program is designed to prepare students to pursue a college degree in some discipline of computer science. After degree completion at an accredited college, a variety of computer science positions are available. Potential employers include corporations, educational institutions, small businesses, self-employment, and more.

About This Occupation
In addition to an interest in computer science, success in this career field requires strong math, science, and critical thinking skills. A positive attitude, perseverance, and willingness to adapt to new technologies and methods of performing work are also essential. In addition, computer science professionals must be able to work both independently and as a team member, and must be able to prioritize and manage projects and tasks to meet deadlines.

Majors:
Computer Science Academy – 1440 hours

## Computer Science Academy

### Who Can Attend:
High school sophomores, High school juniors, High school seniors  

### Total Hours Required:
1,440

### Financial Aid Eligibility:
Not applicable

### Salary Range:
The median salary for Computer Science positions in the Oklahoma City area (with a Bachelor's Degree) is approximately $47,000.00 per year.

### Program Length:
Up to three school years

### Locations:
Rockwell Campus, Information Technology Building

### Times:
Monday - Friday, 8:00 am - 10:55 am and 12:30 pm - 3:25 pm  
Students enroll in either the AM or PM session

### Licensure/Certifications:
Advanced Placement (AP) college credit is available for students who pass AP tests in Calculus, Computer Science, or Physics. Universities vary in their recognition of AP credits. Therefore, the number of available credit hours will depend upon the policies of the specific university a graduate attends.

A total of 14 courses (5 math, 3 science and 6 computer science) are taught in the Academy. However, a 3 year student will be able to complete only 12 of those courses. Therefore, the total hours available in the course list exceed the total number of required hours for the full Computer Science Academy major. The exact course sequence will be determined by previously taken math and science courses as well as the student's career and education goals.
